

## MiniPAC

As the name implies, think of the MiniPAC as a miniature portable workstation. It is geared toward users who require a very portable computer with a lot of storage but not necessarily the best graphics.

It comes with a 15.6" LCD at a resolution of 1366x768. Out of all our portable computers, the MiniPAC has the smallest width and height at 15" and 10" respectively. With 3 full length-expansion slots and up to 16TB of storage, this small portable computer is able to be configured to certain applications while holding a massive amount of storage.
