

AXIS Q7404 Video Encoder

High-performance, full-featured video encoder with H.264.

AXIS Q7404 is a 4-channel video encoder that integrates four analog cameras into an IP-based video surveillance system, delivering superb video quality and significant savings in bandwidth. It delivers multiple, individually configurable video streams simultaneously from each channel at full rate, in all resolutions up to D1. The video streams can be configured with different compression formats, resolutions and frame rates. AXIS Q7404 offers video motion detection, active tampering alarm and audio detection. Each channel has two configurable inputs/outputs for connection to external relays and sensors, and two-way audio provided on one video channel.

- > Superb video quality
- > Multiple H.264 and motion JPEG streams per channel
- > Full frame rate in all resolutions
- > Intelligent video capabilities
- > Two-way audio support and I/O support
