

# X-keys Feather Touch Switch Specifications

For TKB-6100-SBAUX-R

- *Highly responsive*
- *Mouse-click feeling*
- *Easy to mount anywhere*
- *Long switch life - rated over 5 million operations*
- *3.5mm mono plug connector, for use in all our switch enabled devices*

The X-keys Feather Touch Switch is a highly responsive module using a mouse style switch. This switch can be used on the X-keys L-Trac Trackball to create additional buttons. The Feather Touch Switch can also be paired with any X-keys Switch Interfaces to give users another reliable switch option. With the switch life of 5,000,000 operations, the Feather Touch Switch is built to last. The sleek, ergonomic design allows for easy use and requires little force to activate the switch.
