

RJ-45 Port Blocker: Key & Lock

Model No. WST-SRJ001 / WST-SRJ002
WST-SRJ003 / WST-SRJ004

Introduction

Wavesplitter RJ-45 port blockers enhance system security by preventing unauthorized personnel from inserting cables into RJ-45 ports. It also works as a port saver or as a mark showing inactive ports. It is simple to use, easily plug the blocker into the RJ-45 female port. When removing the blocker, insert the key with the corresponding color of the blocker. The design of the key makes it easy to pull out. Wavesplitter RJ-45 port blocker is a small product but plays an important role especially with information security receiving more and more attention.

Key Features

- Easy to use; no need for additional software
- Prevent unauthorized personnel from connecting to a network or system through RJ-45 ports
- Keys are only compatible with blockers of the same color
- Patented product
