

USB-A Port Blocker: Key & Lock

Model No. WST-SUA005 / WST-SUA006
WST-SUA007 / WST-SUA008

Introduction

Wavesplitter USB-A Port Blocker protects data from unauthorized access and prevent any USB peripheral from infecting your device with malware or removing classified data. It also protects USB-A public charging stations from power theft. To use the Port Blocker, simply insert a Lock into a USB-A female port. The special structure of the Key allows it to easily remove a Lock from a port without creating any damage to the port. Wavesplitter USB-A Port Blocker is a simple and easy-to-use product but plays an important role in network security.

Key Features

- Easy to use; no need for additional software installation
- Prevents unauthorized personnel from stealing data or power through USB-A ports
- Keys are only compatible with blockers of the same color
- Compact design of the key stores three additional blockers
- Patented product
